

Supplementary material

Rauno A. Yrjölä, Sari Holopainen, Raimo Pakarinen, Sini Tuoriniemi, Matti Luostarinen, Markku Mikkola-Roos, Petri Nummi & Veli-Matti Väänänen: The Barnacle Goose *Branta leucopsis* in the archipelago of southern Finland – population growth and nesting dispersal. — *Ornis Fennica* 94: 161–171.

Fig S1. The distribution of the first years of geese observations in the research islands. Black bars represent unprotected islands ($N = 74$) and white bars protected islands ($N = 27$). All the islands were inhabited in 2012.

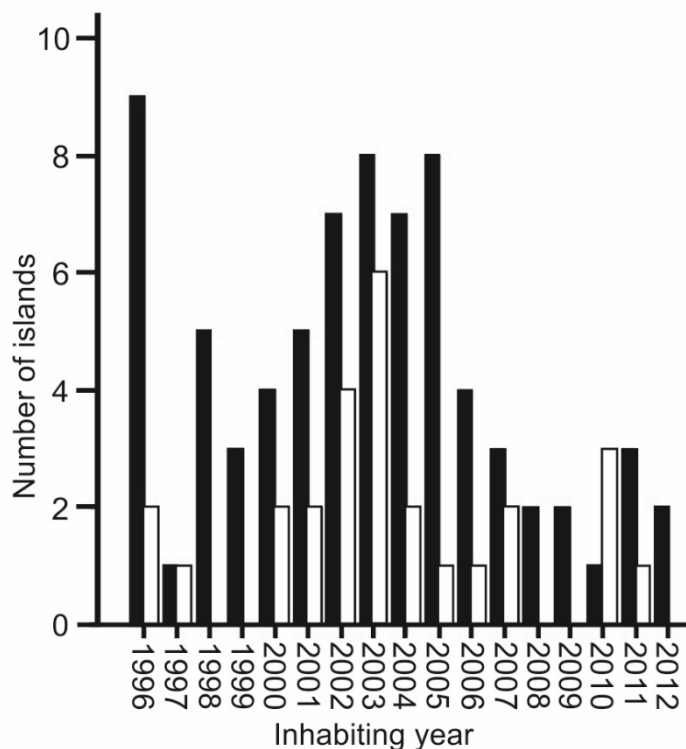

Fig S2. Distribution of breeding Barnacle Goose pairs in the years 1996, 2005 and 2013.
